Product Description

Scag Turf Storm Stand on Spreader - STS30-23BV

30-gallon total liquid capacity keeps you spraying longer. Highly translucent tanks with raised measurement indicators allow for accurate fill levels. Spray booms measuring 65-inches wide allow for spraying widths of 2, 6 or 8 feet wide. A 15-foot flex hose allows you to reach tough spaces.

The 120-pound hopper dry/granular capacity paired with a high-torque electric spreader motor help deliver up to a 25-foot spread width.
