Product Description

Lightweight and Maneuverable!

Just looking for a great brush mower? The PREMIER is our lightest and most maneuverable DR Field and Brush Mower. Unlike its bigger brothers, the PREMIER is designed exclusively as a mower (it does not accept our optional attachments), which allowed us to take weight out of the frame...and that translates into easier, more responsive handling in the field.

With a 26" cutting width and three forward speeds (as well as powered reverse) the PREMIER has everything you need to churn through the thickest field grass and clear out overgrown brush, including saplings up to 2" in diameter. The OHV engine starts easily every time, and the big, lugged tires track reliably over all kinds of uneven terrain. This is one solid mower!

Product Summary

- 10.5 HP manual-starting Briggs & Stratton Engine
- 26" brush deck
- 16" lugged tires (sealant filled, tubeless)
- 3 forward speeds, 1 reverse
- Splash lubrication
- See Features and Specs Tabs for more product details

Warranty Coverage

- Machine: 2 years residential; 90 days commercial
- Engine: 2 years residential; 1 year commercial

Features

Our decks are enclosed on 3 sides, so that cut material is chopped and re-chopped, reducing grass and brush to a fine mulch. This means less material is left behind in your field, and none of the windrows you get with side-discharging mowers.

Assembled in the USA using foreign and domestic parts. Ships direct from our Wisconsin factory.

10.5 HP Briggs & Stratton E Series™ Engine The legendary power, performance and durability of Briggs & Stratton® makes it a great choice for the PREMIER Field and Brush Mower. The PRO 26 10.5 HP model uses a durable 344 cc Overhead Valve E Series™ Series manual-starting Briggs engine with cast-iron cylinder sleeve.

Unlike hydrostatic drives, the DR's geared transmission lets you lock in your ground speed, leaving your hands free to steer the machine across uneven terrain (instead of fussing with touchy throttle controls as you go). With 3 forward gears, you can choose a fixed pace that's right for you.

These are big (16" x 4.75"), lugged tires that pull the PREMIER through or over just about anything, and they are sealant filled...which means they're highly resistant to puncture. Tough as nails, apparently!

Made of 1.375" thick cast iron with oversized double sealed bearings, the blade spindle is integrated into the deck housing and reinforced for vibration-free performance. Designed to provide years of maintenance-free use (and abuse!).

A comfortable working height is important, especially when traversing rough terrain.

Both on the control panel and on the grips, all DR Field and Brush Mowers controls are designed to optimize operator comfort and minimize hand fatigue. Everything you need is right at your fingertips, so there is no walking around the mower to make adjustments.

Our frames and decks are finished with a tough, durable powder coating that resists scratching and promotes long life.
