Product Description

XD Commercial Series: 26" Cut & Honda Engine

Our XD Series Field and Brush Mowers are built for the demands of commercial use: frequent use, long runtimes, daily transport, and ease of maintenance.

The XD26 cuts 26" wide and features a Honda GXV390 engine that is a proven workhorse. Independent hydrostatic wheel drives ensure ease of handling without fatigue. Built in hand guards protect the operator while mowing brush.

Transport is simplified with integrated tie-down hooks that make trailering fast and easy.

Product Summary

- 10.2 HP Honda GXV OHV Engine
- Hydrostatic Drive: 2 independent wheel drives for fingertip control
- Variable speed drive, forward and reverse with zero-turn radius ability
- 26" cutting deck
- Pivoting deck follows contours of ground
- Oil pump for superior performance on hills
- Handguards protect operator's hands from brush and briars
- Integrated tie-downs for ease of transport
- Tool-free drain hose for simple oil changes
- See Features and Specs Tabs for more product details

Warranty Coverage

- Machine: 2 years residential; 2 years commercial
- Engine: 3 years residential; 3 years commercial

Features

Commercial Duty Engine The Honda GXV390 with Overhead Valve delivers reliable, easy starting and fuel-

efficient performance. With 10.2 HP (389cc) it has plenty of power to churn through thick grass and brush. Pressure and Splash lubrication ensures smooth operation on slopes up to 20°. 49 State (not available in CA). Hydrostatic Drive Two independent hydrostatic wheel drives provide a zero-degree turning radius and virtually effortless maneuverability.

Intuitive Operation Hydrostatic controls give you fingertip control. Squeeze the hand lever for forward movement, push the thumb lever for reverse. Action is pressure sensitive, so you set the speed.

26" Wide Pivoting Deck The 26" deck is wide enough for effective clearing but is still very maneuverable. Unlike rigid, fixed decks found on some mowers, the DR deck pivots from side to side, allowing it to follow the contours of rough terrain. This feature minimizes scalping and improves traction.

Custom-Made Blade Spindle Made of 1.375" thick cast iron with oversized double sealed bearings, the blade spindle is integrated into the deck housing and reinforced for vibration-free performance. Designed to provide years of maintenance-free use (and abuse!).

Integrated Tie-Downs 4 welded steel hooks (2 on each side of mower) provide secure anchor points for transportation.

Tool-Free Drain Hose Makes removing oil fast, neat, and easy. No tools needed, just uncap and drain.

Hand Guards Operator's hands are protected from brush, briars, and other obstacles.

Operator's hands are protected from brush, briars, and other obstacles.
