

Dr Power Grader PRO 48

Step up to Powered Remote Control. The 48" PRO with powered remote adds the convenience of push-button adjustment of grading depth while you grade. The cabled remote control is operable from your tow vehicle so you can raise and lower the 12 grading teeth while you drive. You can start high, and lower the tines a bit with each pass.

Product Description

48" PRO Model with Powered Remote Control

Our PRO models offer the convenience of cabled remote control that lets you adjust your grading depth from your tow vehicle while you drive.

12 carbide-tipped grading teeth loosen hard-packed dirt and gravel to remove bumps and washboard, and fill in potholes. The rear leveling blade then spreads the loosened material evenly.

Product Summary

- 48" grading width
- 12 scarifying teeth
- Grading depth regulated by powered remote control

Tow Vehicle Recommendations:

- Utility Tractor
 - ATV
 - 2 years residential; 90 days commercial
-
- 2 years residential; 90 days commercial

Features

Powered Remote Control A rechargeable battery, a powerful electric motor, and a precise remote control raise or lower the scarifying teeth from your towing vehicle with the touch of a button.

Tungsten Carbide Scarifying Teeth The scarifying teeth are 10x harder than steel. This is the same material used on mining equipment to chew through solid rock.

Powered Actuator This powerful actuator provides a 4" stroke, raising the teeth from 4.5" above the surface

(for travel and turning around) to 9/16" below the surface. It's housed in a steel box that shields it from the elements and kicked-up debris.

Rechargeable Battery Can be easily removed without tools for bringing indoors during the off-season. It can be recharged either on or off the grader (charger is included).

Easy Hitch The PRO 48 Power Grader comes with both a pin-hitch and a ball hitch connector (shown).
