Product Description

Reclaim your property with a Tarter 200 Series Landscape Rake! This quick-install attachment features curved C-tines to level uneven terrain and clear rocks/debris off to the side. The tines won't destroy your field by digging too deep. Put the tractor in reverse and watch it push away dirt or rocks. Rotate the rake in multiple angles to choose where the debris lands. An optional wheel kit maintains a consistent depth. The 200 Series Landscape Rake is available in 5-foot and 6-foot models.
