Product Description

Let the Tarter 200 Series Rotary Cutter do the hard work of clearing overgrown land for you! Depend on this durable attachment to cut grass, stalks, and light brush with ease. The heat-treated blades have a 1-inch thick cutting capacity to easily take care of small limbs and branches. In case you run over something bigger, a stump jumper lifts the mower up and over rocks or obstacles, avoiding damage to the gearbox and blades. Available in 5-foot and 6-foot models.
