Product Description

Clear up to 2.4 acres per hour!

Go WIDE with our DR PRO MAX52T Tow-Behind Field and Brush Mower. With a 22HP V-Twin engine and 52" cutting width, this powerhouse will take down the toughest growth you can throw at it and do it fast—covering up to 2.4 acres per hour. Towed with your ATV or UTV, this is the truly easy way to reclaim your property—in ride-on comfort.

Push Button Cutting Height Adjustment

The PRO MAX cuts from 4" to 7.5" high and you can adjust mowing height on the fly with the electric lift feature. A rocker switch (mounted on the same remote control as the blade engagement switch) makes it easy to change on the go.

Product Summary

- 22 HP Electric-Starting V-Twin OHV engine
- 52" mowing deck
- Mows up to 2.4 acres per hour
- Tow Vehicles: ATV, UTV, or Tractor
- Floating deck rides over obstacles
- Mows outside wheelbase
- Mulches everything
- Remote Control for blade engagement and cutting height adjustment
- Pivoting blades

Warranty Coverage

- 90 Day Limited Warranty

Features

22 HP Briggs & Stratton PXi Series Engine

The legendary power, performance and durability of Briggs & Stratton® engines make them the obvious choice for our Tow-Behind Field and Brush Mowers. The PRO MAX52T model uses a durable, V-Twin, 22HP (724cc) Overhead Valve PXi Series engine with cast-iron cylinder sleeve and full pressure oil pump

Floating Deck

The deck is suspended from the frame, allowing it to ride up and over high points, minimizing scalping and protecting the drivetrain from damage.

Assembled in the USA Assembled in the USA using foreign and domestic parts. Ships direct from our Wisconsin factory.

Electric Lift Height Adjustment

Make easy adjustments to the cutting height (from 4" to 7.5") from your tow vehicle. A battery powered actuator does the work, allowing you to change mowing heights on the fly, without stopping.

Remote Control

The cabled remote control can be routed to your tow vehicle, and it handles two different functions: 1) engaging the blade and 2) raising or lowering the cutting height.

Chain Debris Guard

Similar to the debris shields used on commercial roadside mowers, this guard stops material from flying forward.

Mows Outside Wheelbase

The mowing blade extends outside of the wheels—so you can mow right up next to fences, walls, hedgerows and other obstacles without interference.

52" Mulching Deck

The 52" mowing deck is enclosed on 3 sides, so cut material is chopped and re-chopped, leaving no windrows behind.

52" Mulching Deck

The 52" mowing deck is enclosed on 3 sides, so cut material is chopped and re-chopped, leaving no windrows behind.

Mow up to 2.4 acres per hour!

Mowing times will vary with conditions (density of growth and features of terrain), but hooked up to your ATV the PRO MAX52T Brush Mower can clear as much 2.4 acres per hour—while you ride in comfort!
