Product Description

All-Terrain Cleanup!

In rugged, off-lawn areas, trimming and mowing weeds and tall grass can be a hassle. The DR PRO XLT All-Terrain Trimmer Mower allows you to clean up along fence lines, walls, roadside ditches, and other hard-to-reach areas accessible to your ATV, UTV, large riding lawn mower, or tractor. And you do it while you ride, maintaining tough-to-reach parts of your property effortlessly.

At a hefty 192 lbs., the DR PRO XLT rolls easily over hills, rocks, slopes, and bumps, absorbing the punishment of even the most rugged terrain. The spring-loaded trimming head deflects easily around obstacles, leaving you with a close and even cut right up close to fence posts, mailboxes, trees, walls, and any other obstacle. And with over 5X the power of a handheld 'weed wacker', the DR can take down thick weeds and tall grass with ease.

Depending on your towing vehicle, the DR PRO XLT can reach up to four feet outside your vehicle's wheelbase, so you ride in comfort as you take down high weeds. The versatile pin hitch allows you to tow the mower behind any ATV, UTV, lawn tractor, or utility tractor. The height of the hitch is easily adjustable to accommodate most towing vehicles.

Note: When purchasing replacement cord for this model, be sure to choose either the Quick-Lock 13" Pre-Cut Cord or a bulk cord roll.

Warranty Coverage

- Machine: 2 years residential; 90 days commercial
- Engine: 2 years residential; 90 days commercial

Features

Quick-Lock™ Trimmer Head Quick-Lock Trimmer Head makes replacing the cord on your Trimmer Mower faster and easier than ever! It takes just seconds — without tools — to insert new cord into the trimmer head. The patented gripping system anchors the cord instantly, holding tight and never letting go. Accepts our 225 and 255 mil cords — the thickest, longest-lasting cords in the industry!

Spring-Loaded Tensioning The spring-loaded trimmer head easily deflects around trees, rocks, fence posts,

walls, mailboxes, and other obstacles for an even trim right up close. Adjust the tension depending on your mowing obstacles — light tension for delicate shrubs and trees, stronger tension for fence posts and rocks. Offset Cutting Choose one of three angles to either tow in-line behind your mower, or offset to reach outside your mower's cut path.

Ideally Weighted for Rugged Terrain At a hefty 192 lbs., the All-Terrain Trimmer Mower can absorb the punishment of even the roughest terrain. Bumps, hills, rocks, and slopes are no problem!

Versatile Hitch Adjust the height of the pin hitch to match your towing vehicle. Tows easily behind ATVs, UTVs, large riding lawn tractors, or utility tractors.

Smart Shield Cord is enclosed on the cutting edge, but open in the back for easily changing out the trimming cord. Allows you to trim within ½" of any obstacle.

Anti-Scalping Wheel The adjustable-height Anti-Scalping Wheel protects your turf while you mow. Choose your cutting height, and protect all the land and growth beneath it.
