Product Description

The DR® 50" Lawn Sweeper's patented spiral brush efficiently sweeps away more than a standard sweeper while putting less stress on internal gears, and the extra wide 9" intake chute is less likely to clog - even when dealing with damp grass and clippings that can clump together. The "no-slip" positive lock height adjustment features seven height settings, and the reversible hitch accommodates a full range of tractor heights - no spacer rings needed. Emptying the hopper is as simple as pulling on the connected rope right from the seat of your tractor.
