Product Description

Self-Feeding Power

The PREMIER 375 is our smallest dedicated chipper, but it packs a serious punch. DR Self-Feeding design allows it to tear through branches up to 3.75" in diameter, and do it continuously...without bogging down the way underpowered "big box" machines do.

Easy to Maneuver or Transport

An easy-grip handle bar makes for a convenient way to maneuver the PREMIER 375 Chipper by hand. You can also add an optional pin-hitch kit that lets you hook up to your lawn tractor or ATV and tow the PREMIER model around your property.

Product Summary

- 3.75" Chipping Capacity
- Built-in handle for easy maneuvering
- Optional pin-hitch for towing with lawn tractor or ATV
- Briggs & Stratton OHV Engine; 7.0 HP (11.5 ft-lbs gross torque*)
- Manual-Starting
- 14.5" x 23.5" Chipper Hopper Opening
- Hardened Steel PRO-SPEC™ Chipper Knife
- Weight: 164 lbs.

Warranty Coverage

- Machine: 2 years residential; 90 days commercial
- Engine: 2 years residential; 90 days commercial

Features

Self-Feeding Action A large vertically oriented hopper, a precisely-angled heavy-duty chipping knife, and a powerful air channel work together to pull branches into the chipping hopper and blast wood chips out the

discharge. Most materials will self-feed, so once you drop a branch in your free to get the next one. No force feeding required!

Oversized Chipping Hopper Our big chipping hoppers will accept whole armfuls of small branches at branches at once, or even whole trees and saplings — with little or no trimming of side branches. This saves tremendously on the time you spend pruning and preparing materials for chipping.

Off-Road Towing Add the optional pin hitch and you can easily tow the PREMIER 375 Chipper around your property using your ATV or lawn tractor. (Note: for road-towing ability, step up to either the PRO or PRO XL)

Heavy-Duty Flywheel The key to efficient wood chipping is the rotating mass created by the flywheel on which the chipper knife is mounted. The PREMIER 375 Self-Feeding model features a 14" diameter flywheel that's a half-inch thick and weighs a hefty 25 pounds. It spins at 101 mph and takes an amazing 40 "bites" per second!

Briggs and Stratton OHV Engine The legendary power, performance and durability of Briggs & Stratton® engines make them the only ones we use on our DR Chippers. The PREMIER 375 Self-Feeding Chipper uses a durable 7.0 HP (11.5 ft-lbs gross torque*) Overhead Valve, easy-starting engine. It features a debris management system that protects the engine from whatever you kick up while you're chipping and shredding.

Pro-Spec™ Chipper Knife Made of high-carbon/high-chromium forged alloy tool steel, our knives hold an edge longer than those on "bargain" chippers.. Still, as with any cutting tool, keeping a sharp edge is important for maintaining peak performance. We recommend keeping an extra on hand so you can minimize downtime.
