Product Description

Highest Capacity Available!

The DR PRO MAX450 is the highest capacity non-commercial leaf collector available anywhere. When you can collect up to 60 cubic feet (450 gallons) you spend less time emptying the collector and more time gathering leaves and other lawn debris, and leaving your lawn vacuum clean.

To assist with unloading, the PRO MAX is equipped with a powered dump feature that does the hard work for you. You simply unbuckle the closures on the back then push the powered actuator button. It tilts the collector back to a steep 60-degree angle that empties it completely. Then you can power it back to the collecting position.

Get More Done with Accessories

The Optional Vac Hose provides 20 feet of extra reach to clean up areas you can't drive over. Use it to vacuum out flower beds, window wells, hedges, or any other remote areas. Our Mulch Discharger lets you expel collected material and place it right where you want it—in a compost pile or into the woods.

Product Summary

- Collector Capacity: 450 gallons (60 cu. ft.)
- Trailer Capacity: 1100 lbs.
- Single Point Hitch
- Includes Jack Stand
- DR OHV Engine: 11.7 HP (389cc)
- Electric-Starting
- EPA Certified
- Weight: 325 lbs.

- Machine: 2 years residential; 90 days commercial
- Engine: 2 years residential; 1 year commercial

Features

Maximum Capacity The PRO MAX450 holds up to 60 cubic feet (450 gallons)—the highest capacity available in a non-commercial leaf vac. You can collect huge amounts of leaves and debris before you need to stop and unload.

Powered Dump Feature A powered actuator provides push button dumping. It tilts the collector back to a steep 60-degree angle that empties it completely.

All Steel Impeller More durable than the plastic impellers used on competitive products. The steel impeller is covered with a LIFETIME WARRANTY.

Easy Access for Unloading Just unbuckle the enclosures on the back and secure them in open position by clipping to the side.

Accessories Add Versatility The Vacuum Hose lets you get at yard waste in places you can't drive your mower. And the Mulch Discharger allows you to broadcast all that debris right where you want it.

Optimal 8" Hose The 8" hoses offer the ideal balance—narrower hoses clog too frequently, and wider ones lose compression and suction power. We tested extensively and found 8" to be the optimal diameter.

Assembled in the USA Assembled in the USA using foreign and domestic parts. Ships direct from our Wisconsin factory.

Dual Wheels Big 14" diameter dual wheels provide easy rolling maneuverability and spread the weight of big loads out to lessen impact on lawn areas

Trailer Jack Stand Heavy-duty Trailer Jack Stand, for moving the machine easily when not in use. Adapts to pin hitch heights of 8" to 15". Stand lifts out of the way during operation. 4" diameter wheel

Powerful Engine With 11.7 HP (389 cc) this DR engine has the torque you need to create a powerful vacuum force. Electric start (with recoil backup). CARB certified.
