Product Description

Devours 5.75" thick branches!

Our most powerful dedicated wood chipper, designed for the rigors of continuous wood chipping, hour after hour...year after year. Anything too big for this machine can be sold as firewood! You simply can't get a more powerful chipper without getting into the hugely expensive industrial realm.

Put chips right where you want them.

The high discharge on the PRO XL575 model accepts our swivelling, extended discharge chute that turns 180 degrees allowing you to direct wood chips into a pickup truck, a container, or into the woods.

Product Summary

- 5.75" chipping capacity
- Pin-hitch for towing with lawn tractor or ATV is standard
- Optional Road-Tow package available.
- DR OHV Engine; 12 HP (19.6 ft-lbs gross torque*)
- Electric-starting
- 19" x 30.5" chipper hopper opening
- Hardened steel PRO-SPEC™ chipper knife
- Weight: 325 lbs.

Warranty Coverage

- Machine: 2 years residential; 90 days commercial
- Engine: 2 years residential; 1 year commercial

Features

Self-Feeding Action A large vertically oriented hopper, a precisely-angled heavy-duty chipping knife, and a powerful air channel work together to pull branches into the chipping hopper and blast wood chips out the discharge. Most materials will self-feed, so once you drop a branch in, you're free to get the next one. No force

feeding required!

Oversized Chipping Hopper The big opening for branches (19" x 30.5") accepts 5.75" branches with little or no trimming of side branches.

Road Towing Add the optional road tow package and you can easily tow your Chipper on roads at speeds up to 45mph.

Commercial Grade Clutch The commercial-grade centrifugal clutch on the PRO XL575 Chipper is similar to those used in well drilling. There is no load on the engine until it reaches 1,600 rpm. If you do manage to find a branch tough enough to slow the engine to 1,600 rpm, the clutch will automatically disengage the engine until it's back up to speed.

Heavy-Duty Flywheel The key to efficient wood chipping is the rotating mass created by the flywheel on which the chipper knife is mounted. The PRO XL575 Self-Feeding model features a 20" diameter flywheel that weighs a hefty 62.5 pounds. It spins at 144 mph and takes an amazing 40 "bites" per second!

Pro-Spec™ Chipper Knife Made of high-carbon/high-chromium forged alloy tool steel, our knives hold an edge longer than those on "bargain" chippers. Still, as with any cutting tool, keeping a sharp edge is important for maintaining peak performance. We recommend keeping an extra on hand so you can minimize downtime.
