Product Description

Chip branches nearly 5" thick!

The PRO 475 features our DR Self-Feeding design that will let you tear through branches up to 4.75" in diameter without bogging down. A vertically oriented hopper, precisely angled chipping knife and powerful air channel draw materials in and spit them out the chute.

Put chips right where you want them.

The PRO 475 Chipper accepts our swivelling, extended discharge chute that turns 180° allowing you to direct wood chips into a pickup truck, a container, or into the woods.

Product Summary

- 4.75" chipping capacity
- Pin-hitch for towing with lawn tractor or ATV is standard.
- Optional Road-Tow package available.
- DR OHV Engine, 11.7 HP (18.4 ft-lbs gross torque*)
- Available in manual and electric start
- 17" x 27" chipper hopper opening
- Hardened steel PRO-SPEC™ chipper knife
- Weight: 270 lbs.

Warranty Coverage

- Machine: 2 years residential; 90 days commercial
- Engine: 2 years residential; 1 year commercial

Features

Self-Feeding Action A large vertically oriented hopper, a precisely-angled heavy-duty chipping knife, and a powerful air channel work together to pull branches into the chipping hopper and blast wood chips out the

discharge. Most materials will self-feed, so once you drop a branch in, you're free to get the next one. No force feeding required!

Oversized Chipping Hopper The big opening for branches (17" x 27") accepts 4.75" branches with little or no trimming of side branches.

Road Towing Add the optional road tow package and you can easily tow your Chipper on roads at speeds up to 45mph.

Heavy-Duty Flywheel The key to efficient wood chipping is the rotating mass created by the flywheel on which the chipper knife is mounted. The PRO 475 features a 17.75" diameter flywheel that weighs a hefty 50 pounds. It spins at 128 mph and takes an amazing 40 "bites" per second!

Pro-Spec™ Chipper Knife Made of high-carbon/high-chromium forged alloy tool steel, our knives hold an edge longer than those on "bargain" chippers.. Still, as with any cutting tool, keeping a sharp edge is important for maintaining peak performance. We recommend keeping an extra on hand so you can minimize downtime.
