Product Description

STIHL RMA 448 V Battery Powered Lawn Mower

Built for long mowing sessions, the RMA 448 V delivers **up to 1 hour and 15 minutes or 75 minutes of runtime** so you can cover more ground with fewer interruptions. The variable speed self-propelled drive lets you choose a comfortable pace across open stretches and tighter areas around landscaping. For easier everyday ownership, the mono-comfort handlebar provides strength and stability, supports easy height adjustment, and folds down for **compact, foldaway storage** in a garage or shed. When conditions change mid-mow, the integrated mulch flap lets you switch quickly without extra parts, and the 4-in-1 mowing system gives you flexible clipping control. A 13.7-gallon polymer grass bag with directional venting helps reduce dust exposure, and weather resistant construction with ECO mode supports efficient, longer mowing performance.
