Product Description

Scag Turf Storm XL Stand on Spreader

An indispensable tool for the serious landscape chemical applicator or those looking to expand their offerings, the Turf Storm™ is built Scag® tough to treat large properties or residential lawns. Offering liquid and dry capacities for maximum productivity and profitability, the Turf Storm helps create better turf more efficiently than ever before.

60-gallon total liquid capacity keeps you spraying longer. Highly translucent tanks with raised measurement indicators allow for accurate fill levels. Spray booms measuring 8-feet-wide with five nozzles allow for spraying widths of 2, 6, 8 or 10 feet. A 75-foot hose reel allows you to reach tough spaces.

The 220-pound hopper dry/granular capacity paired with a high-torque electric spreader motor help deliver up to a 25-foot spread width. Drain plugs at the lowest part of the tanks allow for quick and convenient tank draining and cleaning in between the uses.
